

GRANDCHEM

SPECIFICATION OF PVC RESIN

PVC resin SG3 K71-72

Property: White powder. Insoluble in water, gasoline and ethanol, expandable or soluble in ether, ketone, fatty chlorohydrocarbons or aromatic hydrocarbons with strong anti-corrosiveness, and good dielectric property

ITEMS	SPECIFICATIONS	PACKING
Average polymerization degree:	1300+/-80	Packing in 25kg PP/ kraft paper. 
Impurity particle number/100g	50 max	
Volatile matter	0.3% max	
Bulk density g/ml	0.50+/-0.04	
0.35mm mesh residue	0.1% max	
Fish eyes number/100cm ²	5 max	
Plasticizer absorbent g/100g	20min	
Initial whiteness	90% min	
Whiteness(160°C, 10min)	78% min	
VCM residuals ug/g	1 max	
K Value	71-72	

Use: Widely used in the production of packing film, plastic carpet, plastic ceiling, sanitary fitting, leatheroid, plastic wallpaper etc.

Storage: Not allowed outdoor storage. Keep away from sunshine and humidity
